Editorial Peer Review Process

Manuscript submission

↓

Manuscript number assignment

↓

Technical screening

The Editorial office will assess the manuscript for its quality and adherence to the journal guidelines

↓

Editorial assignment

The Editor-in-Chief will assign a Handling Editor (an editorial board member whose knowledge and expertise match the subject area) to the manuscript..

↓

With Editor

The Handling Editor will conduct an initial assessment of the manuscript and decide whether to reject it or send the manuscript for the further review process. This is the first decision about the manuscript.

↓

Reviewer assignment

The Handling Editor will assign two reviewers (experts from the subject area) to the manuscript to carry out an assessment of the manuscript based on its merits and scientific credibility.

↓

With Reviewer

Reviewers will conduct an assessment of the manuscript and submit their comments to the Handling Editor.

↓

Editorial Decision

The Handling Editor will prepare a final report based on both his own and the reviewers' comments on the manuscript and will convey the final recommendation to the Editor-in-Chief.

Based on this report and recommendation, the Editor-in-Chief will make the final decision about the manuscript, such as acceptance, major revision, minor revision, or rejection.

1) Accepted manuscripts will proceed to publication after final editing and proofreading.
2) Manuscripts requiring major or minor revisions must be resubmitted as revised manuscripts after being revised as per the reviewers' comments and will undergo the same review process.
3) Rejected manuscripts should not be submitted again to the same journal.
